Hi there!
LEGO
LEGO

A Word To Parents:

As you know, play is a vital part of growing up. And what children play with is important. Things like water and sand and paint that can be shaped and molded provide the most enjoyment. Because they give children a sense of achievement and the freedom to use and develop their growing imaginations.

LEGO® building bricks are fun in the same way. They're so simple that children quickly learn how to build with them. Yet so versatile that children never tire of inventing new ways to build and play with them. And, since every LEGO piece fits together with every other piece in every other set, the possibilities are endless.

LEGO PreSchool

Recommended for girls and boys ages 18 months and up.

A child learns to build with LEGO PreSchool. Every piece in every set is made big, easy for little hands to stack, snap together, and snap apart. Some sets contain arched bricks, too. And all come with at least one wagon – 4 wheels and a platform that fit together with the other pieces to make a car, a rolling horse, anything that moves.

And all PreSchool pieces fit together with regular LEGO bricks. So they're still around long after other preschool toys are gone.

LEGO Building Sets

Recommended for boys and girls ages 3 and up.

There are 5 basic LEGO building sets. Each one gives you doors, windows with shutters, wheels and tires, and a wide variety of building bricks – enough to build hundreds of different things. Bigger sets contain more of everything and special pieces too. Roof bricks, car doors, trees, and turntables to make everything you build more real. So as you get bigger ideas you can get bigger building sets and have even more fun.

LEGO Building Sets with People

Recommended for girls and boys ages 3 and up.

LEGO people make playing with LEGO building bricks more fun than ever. They've got movable arms, heads that turn, hairpieces, and hats. So now you can make tall people and small people. Even funny people. Or a plane and a pilot to fly it. A house and a family to fill it. You can do more things because LEGO people make everything more realistic.

LEGO Models

Did you know you can make models out of LEGO bricks? That's right. These are all exciting LEGO model kits you can build. They have special pieces in them that make them realistic – the way models should be. They're fun to build, and play with too. And you don't glue them. So if you want you can take them apart and build something completely different.

More LEGO Models

These aren't just models, they're whole action scenes. You can build a Brick Yard with a tractor, truck, and crane. A Swiss Villa. A Heliport where you can land a helicopter. Or a Fire House with room enough for 3 fire trucks.

And more LEGO Models

These models have big wheels and lots of special parts. You can make the Steam Shovel go up and down and turn around. The London Bus looks like it should be on a sight-seeing tour. And you can actually steer the Wrecker.

LEGO Motor

The LEGO motor makes everything you build with LEGO sets even more fun to play with. Because it makes things move forward or backward, start or stop. It's all up to you. Build a car and watch it go. Make a windmill spin. Animals crawl. Tractors pull. Build whatever you want and make it move with a LEGO motor.

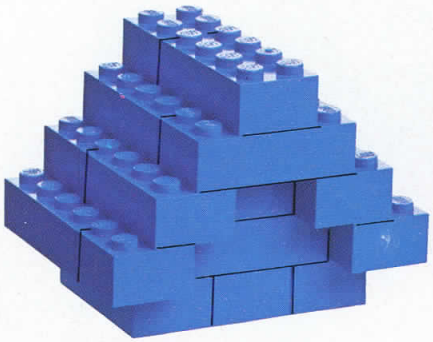
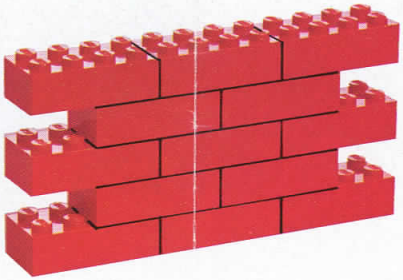
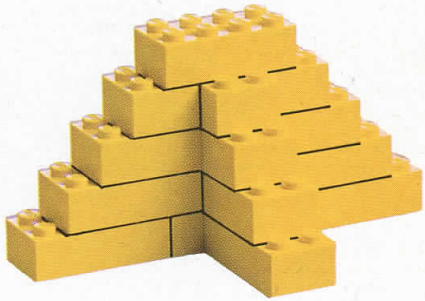
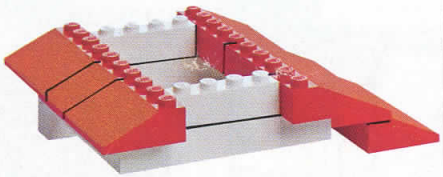
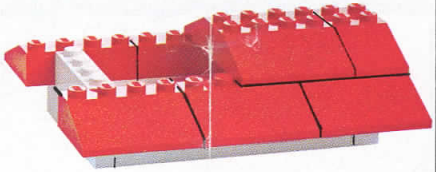
Here are some neat building hints

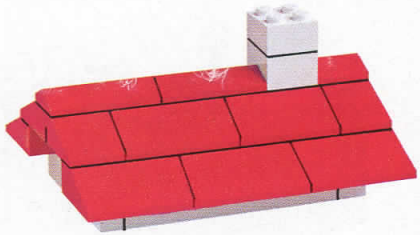


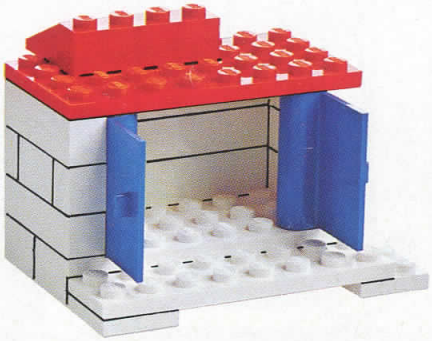


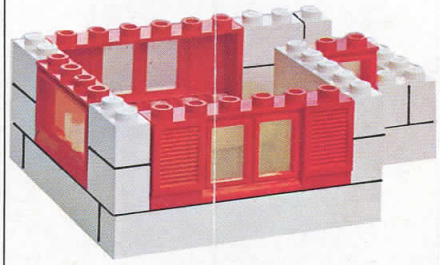


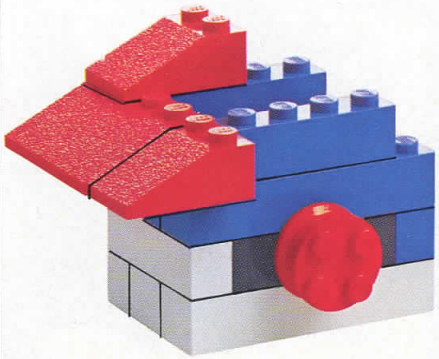












Building with LEGO bricks is fun. It's easy to turn basic shapes into almost anything you can imagine. And if you want more ideas on what to make, send for the LEGO Idea Book. It's full of things to build and ways to build them. Just send your name, address, and $1.75 to:
